PROJECTS

I did a few student projects at my College where I have mainly used frontend technologies such as HTML, CSS and Bootstrap.

You can find an example of my work on my GitHub profile.

For my final work I have created website for a law firm, for which I used HTML, CSS, Bootstrap, JS, php and SQL.

ABOUT ME

I have graduated from the School of Electrical and Computer Engineering of Applied Studies in Belgrade in March 2020.

Until now, I have learned mostly about frontend, but besides that I am interested in backend and I am learning about cyber security in my free time.

I would say that I am dedicated, well organized and friendly person who likes to work in a team, and that's why I believe that under mentorship of a senior I could learn fast and justify your trust if you give me the opportunity to continue my professional growth with you.

FORMAL EDUCATION
